

1

Our Mission:

We have made it our mission to promote the selling of goods through vending machines and collection points. We think across industries and develop custom solutions for special requirements upon request.

2

Individual Use:

Whether chilled, unchilled, fragile, large or small - from use in retail to direct marketing, selling products through our devices offers you independence from prescribed store opening hours. End consumers as well as operators benefit equally from this solution.

History

Before Heinz Renzel founded Kioske GmbH in 2016, he ran a retail business. He recognised early on that there was a high demand for products outside of opening hours. In response to this demand, he placed the first vending machines for fishing supplies next to the traditional shop.

The positive acceptance of the new round-the-clock availability inspired Heinz Renzel to further develop the concept of automated vending and make it accessible to everyone.

Since then, Kioske GmbH, which is based in Bocholt, has been continuously expanding.

We Make the Difference

Our company offers diversity. Not only in terms of our solutions, but rather our opportunities.

The innovative young team brings a lot of inspiration and technical understanding to the table. The expertise and the network that we have been able to build up over the years, offers exactly this in return, opportunities and the power of realisation.

This is reflected in our products in the form of software, hardware and services.

Operation

Alongside Heinz Renzel, who is also a shareholder and managing director at VKF Renzel GmbH, Philipp Papas and Simon Papas have been appointed as managing directors. Together, they lead the dynamic and dedicated team, which has now grown to 14 people. In addition to sales and technical service, the team also includes independent product development.

The product lines of Kioske GmbH are continuously being developed further and supplemented with additional interesting automation solutions.
